

An AI Career Agent for every student

Patch CV helps universities deliver personalised career support at scale — CV and ATS optimisation, job matching, interview preparation and long-term career planning — without adding adviser workload.

The problem

Employability sits in institutional KPIs and funding conversations, but advisory capacity is finite. Thousands of students need individual CV review, tailoring guidance and interview practice each year, so support is rationed by who books first rather than who needs it most. International students, facing unfamiliar CV conventions and recruitment norms, need the most support and typically receive the least.

The solution: four pillars

1. Career Profile Intelligence

- Learns education, skills, experience and goals
- Target roles, industries and locations
- Personalised recommendations that improve with use

2. AI CV Intelligence

- Full CV analysis and scoring
- ATS compatibility and formatting fixes
- Achievement rewriting and role-specific tailoring

3. AI Job Matching

- Roles that genuinely suit the profile
- Skill gaps against target roles
- A clear application strategy per role

4. AI Interview Coach

- Technical, behavioural and role-specific practice
- Structured feedback on every answer
- Confidence scoring and improvement plan

The 90-day pilot

Pilot includes

- Up to 500 student accounts
- AI career assessments
- CV analysis and ATS scoring
- Job matching and skill gap analysis
- Interview preparation with feedback
- Usage analytics for the careers team

University receives

- Cohort engagement insights
- Written end-of-pilot feedback report
- Employability improvement data
- A named contact for 90 days
- Costed rollout proposal, no obligation

No cost and no card during the pilot. No IT integration required to start. Data processing agreement signed before launch.

Pricing after the pilot

Band	Seats	Annual price per student
Department	Up to 1,000	€9
Faculty	1,000 – 5,000	€7
Institution	5,000+	€5

Indicative list pricing, billed annually. Consortium, multi-campus and funded-programme routes priced separately.

Next step

Request a pilot or a 15-minute demo at patchcv.dev/universities. We reply within two working days with a pilot outline scoped to your cohort.
